Acoustic flooring

Windmill Park – Mitcham

In partnership with the A. Proctor Group, Beaumont Forest Products supplied the acoustic flooring batten for this £24.4m social housing project in Mitcham. Windmill Park consists of 212 residential homes, including 1, 2, 3 & 4 bedroom apartments in nine blocks – Allen build Ltd. completed construction in July 2012.

Beaumont Forest Products supplied 60,000 linear metres of A. Proctor Group 'Profloor Resilient Batten' as the floating floor treatment to the separating floors.

Profloor resilient batten is a composite acoustic batten which has been designed to improve the acoustic performance of concrete floors. It comprises of a close cell resilient layer adhered to a planed softwood batten.

This product provides an economical solution to help to satisfy Building Regulation requirements, Approved Document E for England and Wales and Section 5 for Scotland, and will also meet the requirements of Robust Details FFT3 construction.
